

### **Benefits of CLMS**

The Clinical Laboratory Management System is a basic pack of web-application that helps to enhance the pace of workflow and to organize an effective data management system for a laboratory.

Once the CLMS has been deployed, you will have a lot of data that can be easily retrieved. There will be no fear of data loss or damage as the CLMS can store all data with 100% reliability.

A CLMS system will provide various levels of security and audit trails to enable you to trace activity and provide accountability.

CLMS provides users to book appointments and sample pickup by paying the price as quoted by customer.

CLMS is designed for providing information about the medical laboratory to the patients which includes test name, time required, cost, and other details.

CLMS also works to provide users interface to post queries/questions and contact information so, that they can easily contact laboratory staff.
